Sharri:

That one is not the paper. Go to the study done by Hauptmann et al (2009) entitled, "Mortality From Lymphohematopoietic Malignancies and Brain Cancer Among Embalmers Exposed to Formaldehyde" that appeared in the JNCI ; 101: pp 1-13. In the references listed by Hauptmann in his study, on page 12; reference number 8, it lists a study by Milham, S Jr. entitled, "Occupational Mortality in Washington State 1950-1979. Technical Report 83-116 Cincinnati, Ohio National Institute for Occupational Safety and Health, 1983. This study by Milham is the one I am trying to find. Thanks.
